- Mozilla Firefox 23.X

Server technical requirement
Mac OS X v 10.6.8. or higer.

nB **NEOCOLORBOX**

This coloration software was made with the most technological advances to create an amazingly dynamic working environment

Create colorways in a fast way and print them on the fly with the QuickPrint modality. The windows working system allows for agility and safety. Only for Mac OS.
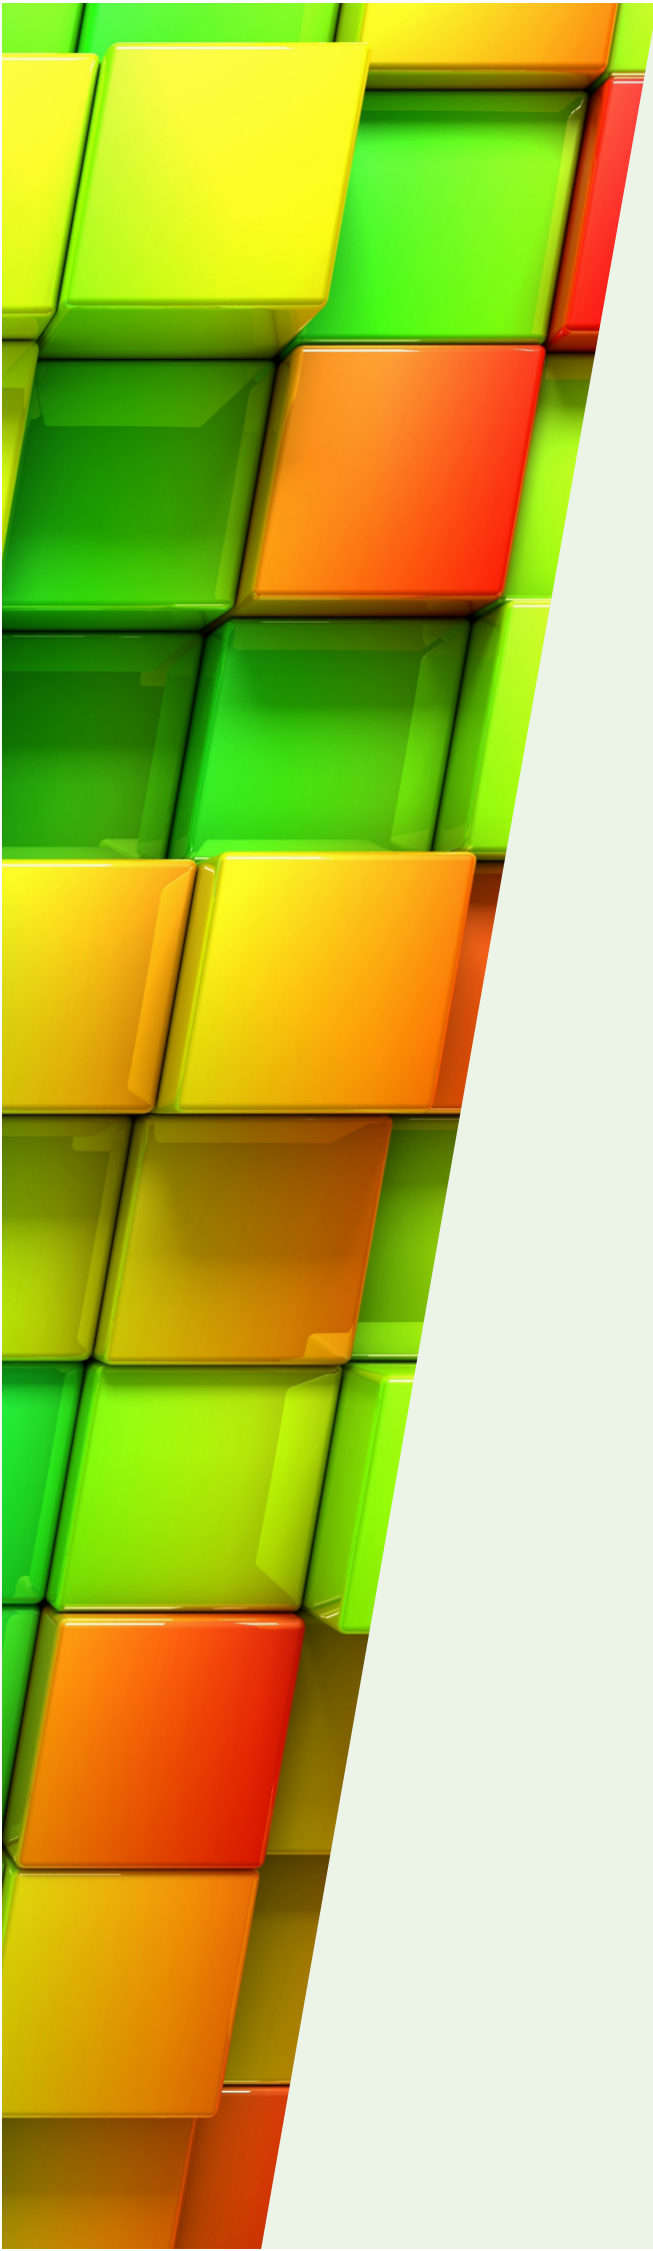

Connect to your neoCatalog to keep your designs, colorways and color libraries updated. Any change in neoCatalog is automatically synchronyzed to all neoColorBox users. The program supports user authentification, keeping the multiple levels of privileges.

You can share colorways and layouts, and it allows to use different profiles for your design.

The program is designed to work in coordination with neoCatalog, connected to a common server. Efficiency in the workflow is a primary consideration.

# Interactive image web catalog to manage your workflow

MORE THAN A VIRTUAL SHOWROOM

If you ever dreamt of making a new colorway, show it instantly to your client, share it with your colleagues, try it on a model and then send it to the other end of the world, now you can do it.

neoCatalog allows to coordinate all the processes of your textile business, running it with the fast pace of our times and embracing the technological environment we live in.

You can decide what can be done and what can be seen by your customers, with full control of the exclusives.

With neoCatalog you join the best commercial partner in our digital era!
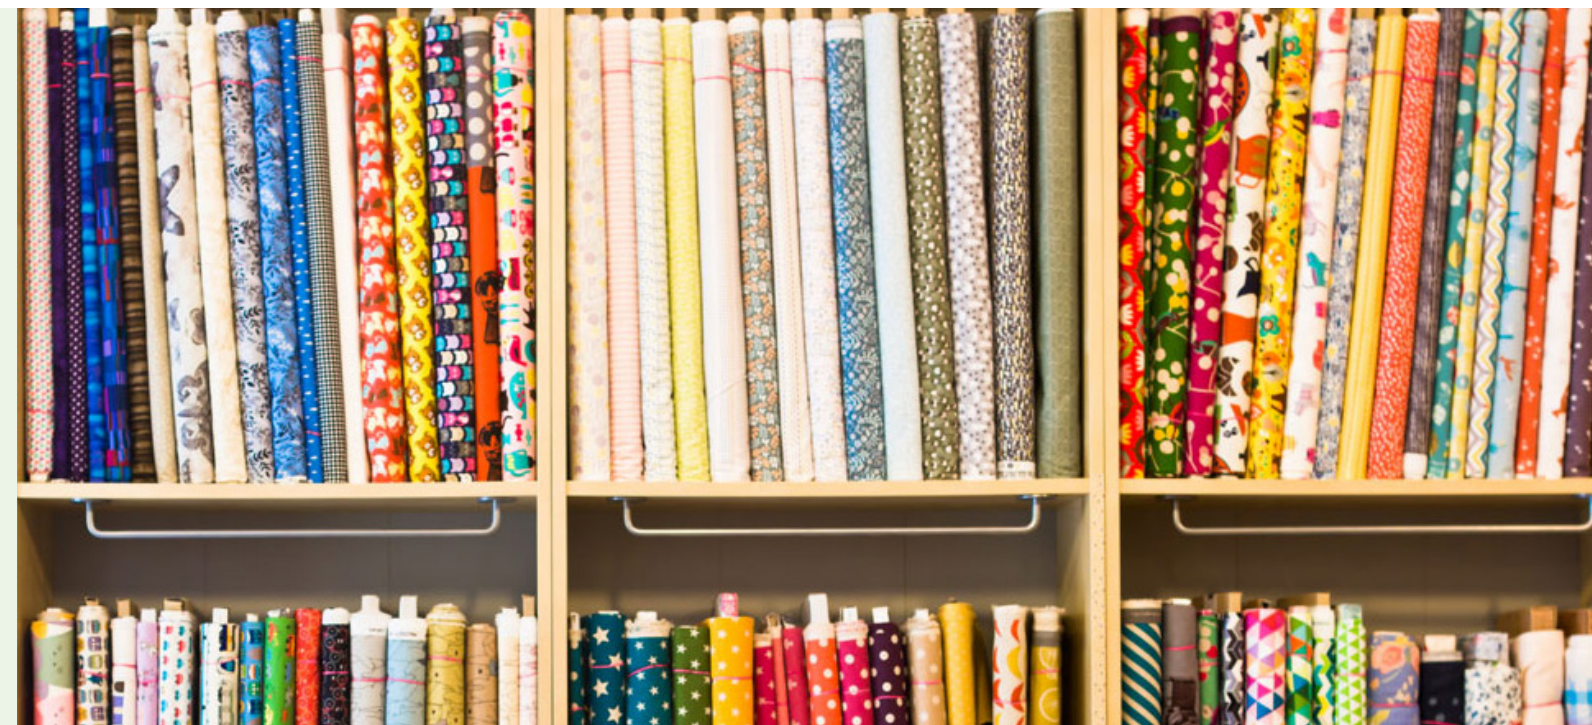

COLORWAYS
Manual or automatic creation of colorways via web

Create colorways with your desired color library just by using a web browser, without any other software.

Upload digital, separated or original designs and generate colorways fast and easily .

ORDERS
Customized types of orders can be set and followed up

The petitions of your clients can be satisfied instantly, and you gain prestige and trust at every step you make.

Your orders are listened and managed so that you always keep record of what it is being printed in your company.

CUSTOMIZE
How do you like your neoCatalog to be?

Your neoCatalog interface can be customized: color, logo, language or previews sizes.

Personalize your export layouts with your corporate visual system.

AMBIENT SIMULATION
Try your designs on models and check their suitability

Load the objects or models you like best, and apply designs on them. Different designs or your color libraries can also be applied to one model.

Generate a PDF document of your simulations and send it directly to your customer.

SECURITY
Several user levels with multiple privileges can be organized

This multi-level privilege option allows to define what your customers can see or do with the designs.

Setting exclusivity of designs and colorways is supported and can be activated at any time.

CONNECTIVITY
Integrate databases or programs into neoCatalog

Most databases you may work with, previously checked and tested, can be connected to neoCatalog.

Use other Inèdit's programs as neoTextil Colorations, neoColorBox or neoStampa to complete your neoCatalog.

PERSONALIZED CONTENT
Large number of designs can be organized to find them easily

Galleries, keywords, collections or status are like the storing boxes for your designs.

Search tools can show mixed groups and can help you identify designs and colorways.

REPLICA & SYNC.
Clone two or more neoCatalogs for the same company

Companies based in different locations can have various neoCatalogs and keep them always synchronized.

With multiple servers you ensure that neoCatalog is always available and the connections work faster.

iOS APP
Take all your designs with you!

neoCatalog can be loaded in your iPad, iPhone or iPod touch to have a copy with you even if there is no Internet connection.

Once the connection is re-established, you can synchronize the information in both platforms.
